Notes

Ingress Protection (IP):
The LED Transformer is primarily intended for independent use. It must not be directly exposed including but not limited to snow, water and ice or any other chemical agent which may have an adverse affect on driver operation and performance. Direct exposure may lead to driver failure. It is recommended to mount the LED Transformer in a box with low IP rating. It is the luminaire manufacturer's / installer's responsibity to prevent direct exposure.

Specified output voltage ripple is based on 0.1uF + 20uF network connected to the driver output.
